

Project Pitch  
by Angel Duarte

# Brief Description

→ Browser Simulations

→ Free & Open Source (GPL)

→ For Education

→ Vernier Probes

→ Other simulations (scalable / modular)

# Me:

- Physics BS
- Philosophy BA
- MED
- Masters in  
Natural Science  
(MNS)
- TA w/ PIRT

Modeling  
Physics  
Education

# Modeling Physics Education

- ASU
- physics grassroots
- constructivist pedagogy
- philosophy of science
- formal syntactic logic
  - ↳ deductive reasoning
- epistemic construction of theoretical models
- hands-on approach

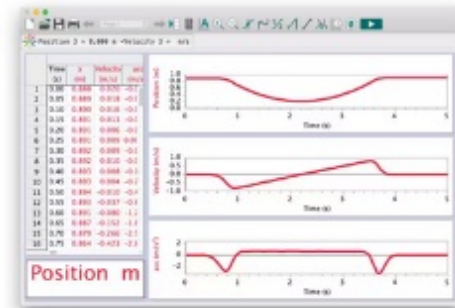

# Vernier Probes & Software

# Vernier Logger Pro

---

- Sensors
- Proprietary Software
- Discontinued
- Windows is awful  
Linux good

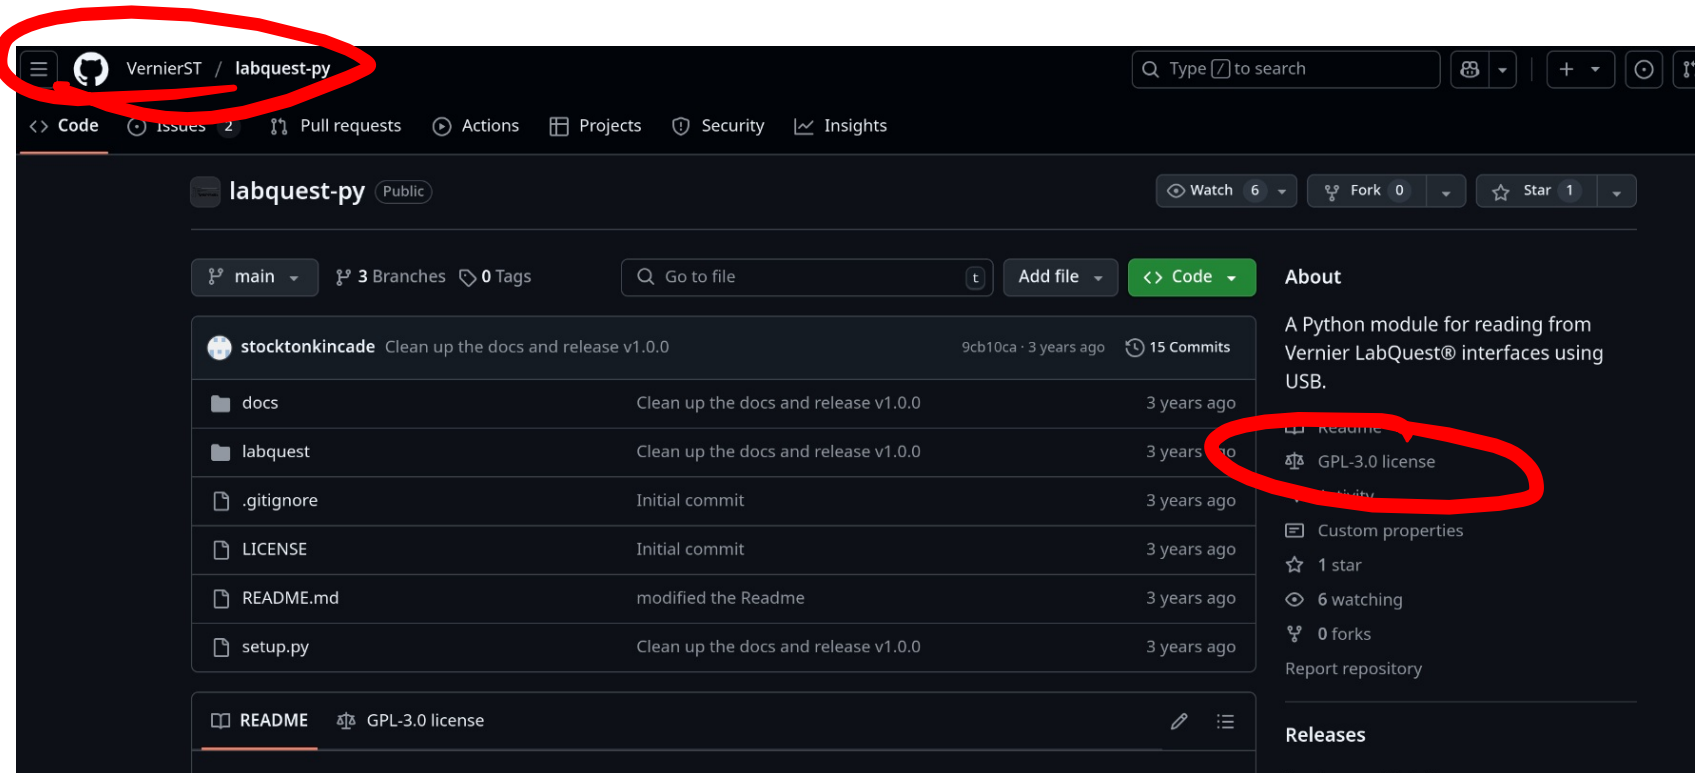

## Logger Pro® 3 Final Update

Logger Pro is no longer under development and will not receive further updates. As of December 31, 2024, we are no longer selling new licenses for Logger Pro. [Click here for more information.](#)

# Vernier Open Source

- FOSS
- Vernier
- Labquest
- Geo
- Arduino

PyScript is an open source platform for *Python in the browser*.  
The latest version is [2025.3.1](#).

```
MicroPython v1.24.1 on 2024-11-30; JS with Emscripten
Type "help()" for more information.
>>> print("Hello, from PyScript!")
Hello, from PyScript!
>>> # Your turn...
>>> print("Hello PHY 432")
Hello PHY 432
>>> 
```

# The vision:

or  
URL

# Sensors:

→ Motion →  $x \rightarrow \frac{dx}{dt} \rightarrow \frac{d^2x}{dt^2}$

→ Photogates

↳ more

# Other options

- Multiple-body  
Projectile motion  
Simulation

like

or  
Eldin  
Rings

# Libraries:

---

- numpy
- Matplotlib (animation)
- Ayscript
- Turtle?
- IDK

# Objectives:

- At least one functional, fully featured lab (+ Back-end)  
(+ Front-end)
- Make probes useable
  - Lab relevant analysis tools
- Produce animations for simulations
- Make it useable & customizable for PIRT
  - no chatgpt phase
- Proof of concept sorta thing

# Questions?
